Northumberland
Family Health Team**

Cobourg Clinic
Cobourg Medical Centre
Cobourg Health Centre

All results will be
recorded in your medical
chart and reported back
to your family physician

A PAP test is the most
common way to find
cell changes in the
cervix that lead to
cancer

Women who are or
have been sexually
active have a Pap test
every 3 years starting
at age 21 until at least
age 70 or when
advised by a doctor or
nurse practitioner to
stop.
